ABDULFATAI SAKA

Python Backend & Full-Stack Developer

Abuja, Nigeria | +234 803 152 8212 | zaabdulfatai@gmail.com
Portfolio: abdulfatai-portfolio.vercel.app | github.com/ibnzachariya | linkedin.com/in/abdulfatai-zachariya-145526374

PROFESSIONAL PROFILE

Python and full-stack developer who designs, builds and ships complete products, from database and API to web frontend, Android app, payments and cloud deployment. Founder and sole developer of three live products (Cliqo, Cliqo Health and CliqoCheck) and a NAFDAC pilot prototype (CheckAm), and backend-turned-full-stack developer on SiteLedger, a multi-team fuel and asset operations platform built under the NCDMB Digitalization Initiative.

Holds an MTech in Analytical Chemistry and spent six years teaching, which brings a methodical, data-driven approach and the ability to explain technical work clearly to non-technical people. CAPM-certified project manager, with training in safety management and graphic design.

TECHNICAL SKILLS

Backend: Python, FastAPI, Flask, SQLAlchemy, REST API design, PostgreSQL, SQL, authentication and role-based access control, multi-tenant data scoping

Frontend: React, Vite, HTML, CSS, Bootstrap, Jinja templates

Mobile: Native Android with Kotlin and Jetpack Compose (UsageStatsManager, in-app payments, signed APK releases)

Cloud & DevOps: Railway, Vercel, Cloudflare (Pages, Workers, R2), Neon PostgreSQL, Netlify, Git, GitHub Actions, custom domains and DNS

Payments & Integrations: Paystack (card, transfer, USSD), Formspree, email

Data & Automation: Pandas, Matplotlib, Selenium, BeautifulSoup, Tkinter desktop apps

Project & Productivity: CAPM project management, Notion, ClickUp, Slack, Microsoft Office, graphic design

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer — Cliqo (independent products)

2026 – Present

Abuja, Nigeria · Sole developer: product design, development, deployment and launch

- **Cliqo** (marketplace for trusted service providers, cliqo.com.ng)
- Built the FastAPI + PostgreSQL backend and React/Vite frontend, with Paystack payments and an owner/sub-admin admin area.
- Deployed on free tiers: backend on Railway, database on Neon, frontend on Cloudflare with the custom domain cliqo.com.ng; Android app downloadable from the website.
- **Cliqo Health** (low-cost remote consultation platform, health.cliqo.com.ng)
- Built provider verification (proof of licence, open profession list), chat/voice/video/group consultations, sign-up credits and pay-as-you-go billing with a 5% platform fee, plus English and Nigerian Pidgin interfaces.
- Deployed the API on Railway, PostgreSQL on Neon, and the web app as a Cloudflare Worker, with uploaded files on Cloudflare R2.
- **CliqoCheck** (native Android app, cliqocheq.netlify.app)
- Built in Kotlin and Jetpack Compose with Android UsageStatsManager to show which apps were opened and when; added a paid App Lock + intruder-selfie feature with in-app Paystack payments.
- Automated signed APK builds with GitHub Actions and launched publicly through its own download page.

Full-Stack Developer — SiteLedger, NCDMB Digitalization Initiative (NDI)

Jul – Oct 2026

Trainee on a four-track capstone (Full Stack, Data Analytics, Cloud, ML) · fuel & asset operations platform · siteledgermanagement.com

- Built Flask blueprints, SQLAlchemy models and REST APIs for fuel deliveries, tank dips, suppliers and site assets.
- Implemented authentication, role-based access control and per-site data scoping.
- Aligned backend models with the Data team's PostgreSQL schema and exposed reconciliation results (fuel variance and leakage flags) and dashboard endpoints.
- Delivered the maintenance and compliance module: schedules, checklists, incident logging and automated reminder notifications.
- Migrated data from SQLite to Neon PostgreSQL, deployed the API on Vercel under a custom subdomain, and later took over the frontend as well.

Teacher — L.G.E.A Demonstration College

2019 – 2025

- Planned and delivered lessons, assessed student progress, and explained complex topics in simple terms.

Corps Member (NYSC) — Nigerian Institute for Trypanosomiasis Research, Kaduna

Industrial Training (SIWES) — NAFDAC Laboratory, Kaduna 2017

Computer Training — I.C.S.S Computer Institute 2017

OTHER PROJECTS

CheckAm — Fake Product Checker for NAFDAC 2026

Pilot prototype prepared for NAFDAC

- Shoppers scan a barcode/QR code, type a NAFDAC number or scratch PIN, or photograph the pack for an AI check; suspected fakes, with location and market, appear instantly on a NAFDAC desk view. Includes manufacturer and pharmacy/trader views.

Oil & Gas Compliance Management Platform

Python desktop application · Tkinter, Pandas, Selenium, BeautifulSoup, Matplotlib

- Equipment management, maintenance scheduling, vendor price comparison, automated regulatory news and weather advisories, and an analytics dashboard; packaged as a Windows executable.

Personal Portfolio Website 2026

Flask, Jinja, Bootstrap · deployed on Vercel · abdulfatai-portfolio.vercel.app

- Data-driven site (projects stored as JSON) with project case-study pages and a spam-protected contact form.

EDUCATION

MTech, Analytical Chemistry — Federal University of Technology, Minna 2025

BSc, Chemistry — Bayero University Kano 2018

IJMB — Kogi State Polytechnic 2013

CERTIFICATIONS & TRAINING

Certified Associate in Project Management (CAPM®) — Project Management Institute

International Executive Certificate in Safety Management (IECSM) — La Plage Meta Verse 2026

Graphic Design — V.S.L Concepts Digital Marketing Agency 2021

MPCBP Certificate — Chartered Institute of Loan & Risk Management of Nigeria 2019

LEADERSHIP & MEMBERSHIPS

- Welfare Officer, Kogi State Science Students Association (KOSSA), BUK Chapter
- Member, Junior Chamber International (JCI) Nigeria
